

Problem Solution Fit

Problem-Solution Fit Canvas

Field	Details
Date	30 sep 2026
Team ID	SWTID-2026-7796
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Section	Content
1. Customer Segment (CS)	IT procurement team, IT department members, employees requesting standard laptops, and hardware configuration team.
2. Problems / Pains + Frequency (PR)	Manual handling of standard laptop requests, delays in laptop configuration, missed configuration steps, increased manual work, and longer user waiting time.
3. Triggers to Act (TR)	A user places a request for a standard laptop through the Service Catalog and the request requires approval and configuration.
4. Emotions Before / After (EM)	Before: Frustration due to delays, manual work, and waiting for configuration. After: Improved user experience through timely configuration and a streamlined process.
5. Available Solutions – Pros & Cons (AS)	Available solution: Manual IT procurement and configuration process. Pros: Existing process and human control. Cons: Time-consuming, manual intervention, possible oversight, delays, and inefficient resource allocation.
6. Customer Limitations (CL)	Dependence on manual processing, limited IT resources, delays in task assignment, and the need for proper laptop configuration after approval.
7. Behavior + Its Intensity (BE)	Users submit standard laptop requests and wait for approval and configuration. IT staff manually handle requests and configuration tasks. The repeated manual activities create additional workload.
8. Channels of Behavior (CH)	Online: ServiceNow Service Catalog and Flow Designer. Offline: IT procurement and hardware team activities related to laptop configuration.
9. Problem Root / Cause (RC)	Lack of automation in the standard laptop procurement workflow causes manual task creation, assignment delays, possible oversight, inefficient resource allocation, and longer waiting time.
10. Your Solution (SL)	Implement a ServiceNow Flow Designer automated workflow that creates a Catalog Task after approval, updates the short description, assigns the task to the Hardware group, and connects the workflow to the Standard Laptop service catalog item.

Simple Problem → Solution Flow

User requests Standard Laptop
↓
Approval required
↓
Flow Designer automatically runs
↓
Catalog Task is created
↓
Task assigned to Hardware group
↓
Laptop configuration is initiated
↓
Reduced manual work + reduced waiting time
