Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Maximum Marks: 1 Mark

SKILL WALLET

A SmartBridge Product

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Overview	Introduce team members, explain current IT procurement inefficiencies regarding laptop orders, and highlight key project objectives.	2	POORNA LAKSHMI M

2	Flow Designer Setup	Demonstrate creation of the "Standard laptop task" flow, trigger setup (Service Catalog), and action configurations (Create Catalog Task assigned to Hardware).	3	Vajitha T
3	Flow Assignment to Catalog	Show how the automated flow is linked to the "Standard Laptop" item under Maintain Items in Process Engine.	2	Sneka N
4	Service Catalog Order & Approval	Demonstrate requesting a Standard Laptop via Service Catalog, generating REQ0010001, and approving the request as an approver.	3	Kanisiya G

5	Automated Task Generation Verification	Validate the automatic creation of Catalog Task (SCTASK0010001) with short description update and Hardware group assignment.	3	POORNA LAKSHMI M
6	Conclusion & Impact Summary	Summarize efficiency gains, reduction in manual overhead, and overall impact on IT operations.	2	POORNA LAKSHMI M

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Present team roles, manual bottleneck in laptop procurement, user story, and project scope.
2	Solution Overview	High-level explanation of using ServiceNow Flow Designer to automate configuration task assignment upon request approval.

3	Live Feature Demonstration	Live walk-through covering Milestones 1 to 3: Flow activation, Maintain Items linkage, order placement (REQ0010001), approval workflow, and verifying SCTASK generation.
4	Q&A Session	Address evaluator questions regarding trigger configurations, assignment group logic, and process optimization.
