

Code-Layout, Readability and Reusability

	Details
Date	30 sep 2026
Team ID	SWTID-2026-7796
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability: This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

S.No	Code Quality Parameter	Description	Followed (Yes/No/Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Maintained uniform workflow indentation in Flow Designer
2	Proper File Structure	Files and folders are logically organized	Yes	Configured within ServiceNow Global Scope under Flow Designer and Service Catalog
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Clear naming convention used for flow ("Standard laptop task") and task fields

S.No	Code Quality Parameter	Description	Followed (Yes/No/Partial)	Remarks
4	Function/Method Names	Functions are descriptively named	Yes	Descriptive action blocks like "Create Catalog Task" and Service Catalog triggers
5	Code Comments	Inline and block comments explain logic	Yes	Descriptions and short descriptions explicitly document task actions
6	Modular Design	Code is split into reusable functions/modules	Yes	Separated into distinct milestones: Flow design, Process Engine linkage, and Request Fulfillment
7	No Redundant Code	Duplicate or unused code is removed	Yes	Removed default/unnecessary automations under Process Engine when linking the new flow
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Configured structured request and approval validation stages

Reusable components/Modules :

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Flow Designer Workflow	ServiceNow Flow Designer	Linked to the "Standard Laptop"	High

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
	("Standard laptop task")		item under Maintain Items	
2	Service Catalog Trigger Integration	ServiceNow Process Automation	Listens to Service Catalog events for instant execution	High
3	Automated Catalog Task Generation (SCTASK)	ServiceNow Core Actions	Automatically assigns tasks to the Hardware group upon request approval	High
4	Request & Approval Workflow	Service Catalog / Request Fulfillment	Handles user checkout (REQ/RITM generation) and approval processing	High

Overall Code Quality Assessment:

SMARTBRIDGE Date | 15 March 2026 Team ID | SWTID-2026-7796 Project Name | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks | 5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes/No/Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used	Yes	Maintained uniform workflow

S.No	Code Quality Parameter	Description	Followed (Yes/No/Partial)	Remarks
		throughout the code		indentation in Flow Designer
2	Proper File Structure	Files and folders are logically organized	Yes	Configured within ServiceNow Global Scope under Flow Designer and Service Catalog
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Clear naming convention used for flow ("Standard laptop task") and task fields
4	Function/Method Names	Functions are descriptively named	Yes	Descriptive action blocks like "Create Catalog Task" and Service Catalog triggers
5	Code Comments	Inline and block comments explain logic	Yes	Descriptions and short descriptions explicitly document task actions
6	Modular Design	Code is split into reusable functions/modules	Yes	Separated into distinct milestones: Flow design, Process Engine linkage, and Request Fulfillment
7	No Redundant Code	Duplicate or unused code is removed	Yes	Removed default/unnecessary automations under Process Engine when linking the new flow

S.No	Code Quality Parameter	Description	Followed (Yes/No/Partial)	Remarks
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Configured structured request and approval validation stages

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Flow Designer Workflow ("Standard laptop task")	ServiceNow Flow Designer	Linked to the "Standard Laptop" item under Maintain Items	High
2	Service Catalog Trigger Integration	ServiceNow Process Automation	Listens to Service Catalog events for instant execution	High
3	Automated Catalog Task Generation (SCTASK)	ServiceNow Core Actions	Automatically assigns tasks to the Hardware group upon request approval	High
4	Request & Approval Workflow	Service Catalog / Request Fulfillment	Handles user checkout (REQ/RITM generation) and approval processing	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Logically structured across Flow Designer, Service Catalog, and Process Engine components.

Aspect	Rating (1-5)	Comments
Readability	5	Clear naming conventions, structured stages, and descriptive task configurations.
Reusability	5	Modular design allows the automated workflow to be reused across standard hardware procurement items.
Documentation / Comments	5	Well-documented activity steps, short descriptions, and task configurations.
Overall Score	5	Excellent implementation fulfilling all project milestones cleanly and efficiently.
