Date	30 sep 2026
Team ID	SWTID-2026-7796
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Maximum Marks: 3 Marks

Project Executable Files

This section presents the project information and execution details based on the submitted project content. The project is implemented as a ServiceNow Flow Designer workflow for automating standard laptop procurement and configuration.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	NA
2	README / Setup Guide (instructions to run the project)	NA
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	NA
10	Demo video or walkthrough (if required)	NA

Step 2: File / Folder Structure

The supplied project content describes a ServiceNow Flow Designer implementation rather than a local source-code folder structure. Therefore, a file/folder structure is not specified in the source material.

Problem Statement

The current IT procurement process lacks efficiency and automation, resulting in delays and manual overhead, particularly in handling standard laptop orders. Requests for standard laptops often require configuration, but this step

is prone to oversight or delay, leading to frustration among users and inefficient resource allocation within the IT department.

User Story

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that tasks are automatically generated and assigned to the hardware team for configuration. This will ensure that laptops are promptly configured upon arrival, reducing user wait times and minimising manual intervention.

Project Objective

The objective of this project is to implement an automated workflow using Flow Designer to facilitate the procurement and configuration of standard laptops. By integrating automation into the process, the project aims to:

1. Create a seamless experience for users requesting standard laptops by ensuring timely configuration.
2. Reduce manual intervention and potential errors in the procurement process.
3. Improve resource utilisation within the IT department by optimising task allocation.
4. Enhance overall efficiency and productivity in IT procurement operations.

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not specified in the supplied project content
Login Credentials (Demo)	Not specified in the supplied project content
Platform / Hosting Provider	ServiceNow
Repository Link	Not specified in the supplied project content
Demo Video Link	Not specified in the supplied project content

Milestone 1: Flow

Activity 1: Create a Flow to Create Catalog task to update the short description after approval of the service request and assign the task to the Hardware group.

5. Open ServiceNow.
6. Click on All and search for Flow Designer.
7. Click on Flow Designer under Process Automation.
8. Click New and select Flow.
9. Under Flow properties, give the Flow Name as "Standard laptop task".
10. Set Application as Global.
11. Select Run user as "System user".
12. Click Submit.
13. Click Add a trigger.
14. Search for "Service Catalog" and select it, then click Done.
15. Under Actions, click Add an action.
16. Search for "Create Catalog Task" and select it.
17. Select Action as Create Catalog Task.
18. Drag and drop the Requested Item Record into Request item.
19. The table is auto-populated as Catalog Task.
20. Set Short description as "Laptop need to Configured".

21. Add the Description field with the value “Laptop need to Configured”.
22. Set Assignment group as “Hardware”.
23. Set Approval as “Approved”.
24. Leave the remaining fields as default and click Done.
25. Save the Flow and click Activate, then click Activate again.

Milestone 2: Flow Assignment

Activity 1: Flow Assignment to Standard laptop service Catalog.

26. Open ServiceNow.
27. Click All and search for Maintain Items.
28. Select Maintain Items.
29. Under the Name field, search for Standard Laptop and select that record.
30. Under the record, select Process Engine.
31. Remove the remaining automations and add Flow.
32. Add the flow created with the name “Standard Laptop Task”.
33. Click the menu to save the record.

Milestone 3: Service Catalog

Activity 1: Service Catalog for placing order and getting approval.

34. Click All and search for “Service Catalog”.
35. Click Service Catalog and then click Hardware.
36. Find “Standard Laptop” and click it.
37. Click “Order Now” to place the request.
38. View the Order status and click the Request Number.
39. Open the Requested Number record.
40. Scroll down to the Approvers section.
41. Right-click the record and click Approve.
42. Click the Requested Item section.
43. Open the Requested Item record.
44. Scroll down to the Catalog Tasks section.
45. Open the record to see the updated status, Short description, and Assigned group.

Step 4: Run Instructions

The supplied project is a ServiceNow Flow Designer workflow. The following execution steps are the project’s documented workflow sequence:

46. Create and activate the “Standard laptop task” Flow in Flow Designer.
47. Configure the Service Catalog trigger and Create Catalog Task action.
48. Assign the flow to the Standard Laptop service catalog item through Maintain Items > Process Engine.
49. Open Service Catalog > Hardware > Standard Laptop.
50. Select Order Now and submit the request.
51. Open the request number and approve the request from the Approvers section.
52. Open the Requested Item and check the Catalog Tasks section.

53. Verify that the catalog task shows the updated Short description and Hardware assignment group.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Not specified in the supplied project content	Not specified
2	Not specified in the supplied project content	Not specified
3	Not specified in the supplied project content	Not specified

Conclusion

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.
