

Customer Journey Map

Date	29 Sep 2026
Team ID	SWTID-2026-7796
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Request	Stage 2 Approval & Task Creation	Stage 3 Configuration & Tracking
Actions What does the customer do?	- Opens ServiceNow. - Finds Service Catalog. - Selects Standard Laptop. - Places the order.	- Checks order status. - Request goes for approval. - Approval is completed. - Flow creates the catalog task.	- Hardware team receives task. - Laptop configuration is performed. - User checks updated request/task status.
Touchpoint What part of the service do they interact with?	- Service Catalog - Standard Laptop item - Order Now	- Request record - Approvers section - Flow Designer automation	- Requested Item record - Catalog Tasks section - Hardware assignment
Customer Thought What is the customer thinking?	- Is the right laptop selected? - Will my request be processed quickly? - Is the order submitted correctly?	- When will approval happen? - Will the task be assigned automatically? - Is there any delay?	- Has the laptop been configured? - Can I see the task status? - Is my request completed?
Customer Feeling What is the customer feeling?	- Hopeful for a quick process. - Slightly concerned about delays.	- Reassured when approval is completed. - Less frustrated because manual follow-up is reduced.	- Satisfied when configuration is completed promptly. - Confident when status is visible.

SMARTBRIDGE | SKILL WALLET

Process Ownership Who is in the lead on this?	• Requesting user • IT procurement team	• Approver • ServiceNow Flow Designer • IT procurement team	• Hardware team • IT procurement team • Requesting user
Opportunities How can we improve this stage?	• Make the Standard Laptop item easy to find. • Provide clear request information. • Reduce unnecessary manual entry.	• Automate approval-triggered task creation. • Automatically set description and assignment group. • Reduce manual intervention and errors.	• Give clear task/status visibility. • Ensure Hardware tasks are assigned promptly. • Complete configuration before user needs the laptop.
