Project Objective

The objective of this project is to implement an automated workflow using **Flow Designer** to facilitate the procurement and configuration of standard laptops. The project aims to:

1. Create a seamless experience for users requesting standard laptops.
2. Reduce manual intervention and potential errors.
3. Improve resource utilisation within the IT department.
4. Enhance overall efficiency and productivity in IT procurement operations.

The project source specifically describes creating the Flow, assigning it to the **Standard Laptop** catalog item, placing the order through **Service Catalog**, approving the request, and verifying the generated catalog task.
