

Ideation Phase

Project Title: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team ID : SWTID-2026-7796

1.Introduction

The idea for this project is to **automate the Standard Laptop procurement process in ServiceNow** using Flow Designer. The project was proposed to reduce manual work and delays in creating and assigning laptop configuration tasks.

2. Identification of the Problem

The existing procurement process involves manual handling of standard laptop requests. Configuration tasks may be missed or delayed after a laptop request is made, which can increase user waiting time and cause inefficient use of IT resources.

3. Proposed Idea

The proposed idea is to create an **automated workflow using ServiceNow Flow Designer**.

The workflow should:

- Allow users to request a Standard Laptop.
- Process the request through approval.
- Automatically create a Catalog Task after approval.
- Add the required laptop configuration description.
- Automatically assign the task to the **Hardware** group.

4. Key Idea

The main idea can be represented as:

Laptop Request → Approval → Automatic Task Creation → Hardware Assignment → Laptop Configuration

5. Expected Benefits

The idea aims to:

- Reduce manual intervention.
- Reduce processing errors.
- Reduce user waiting time.
- Improve IT resource utilization.
- Improve efficiency and productivity.

- Provide a smoother procurement process.

6. Conclusion

The Ideation Phase establishes the idea of using **ServiceNow Flow Designer to automate Standard Laptop procurement and configuration**. This idea forms the foundation for the requirement analysis, design, planning, and development phases of the project.
