

Project Design Phase

Project Title: Streamlining IT Procurement – Automating Standard Laptop Orders with Flow Designer

Team ID : SWTID-2026-7796

1.Introduction

The project design focuses on designing an automated workflow for Standard Laptop procurement using ServiceNow Flow Designer. The design connects the Service Catalog request, approval process, automatic catalog task creation, and Hardware team assignment.

2. System Design

The system is designed with the following main components:

- **Service Catalog – Used by users to request a Standard Laptop.**
- **Approval Process – The request must be approved before the configuration task is created.**
- **Flow Designer – Automates the procurement workflow.**
- **Catalog Task – Automatically created for laptop configuration.**
- **Hardware Assignment Group – Receives the task for configuration.**

3. Workflow Design

The workflow is designed as:

Standard Laptop Request

↓

Service Catalog Trigger

↓

Request Approval

↓

Create Catalog Task

↓

Set Description

↓

Assign to Hardware Group

↓

Laptop Configuration

The Flow Designer uses Service Catalog as the trigger and Create Catalog Task as the action.

4. Flow Design Requirements

The flow is designed with:

- **Flow Name:** Standard Laptop Task
- **Application:** Global
- **Run As:** System User
- **Trigger:** Service Catalog
- **Action:** Create Catalog Task
- **Short Description:** Laptop need to Configured
- **Description:** Laptop need to Configured
- **Assignment Group:** Hardware
- **Approval:** Approved

5. Service Catalog Design

The Standard Laptop service catalog item is connected to the created flow. The existing process automation is removed and the Standard Laptop Task flow is assigned to the catalog item.

6. Expected Design Output

After the design is implemented, when a user orders a Standard Laptop and the request is approved, the system should automatically create a Catalog Task and assign it to the Hardware group for configuration.

7. Conclusion

The Project Design Phase defines how the Service Catalog, approval process, Flow Designer, Catalog Task, and Hardware team work together. This design provides the structure needed to implement the automated laptop procurement workflow in ServiceNow.
