

Solution Architecture

Date	15 March 2026
Team ID	SWTID-2026-7796
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides an intuitive user ordering interface via Service Catalog. Allows end users to select 'Standard Laptop', specify hardware requirements, and track order stages in real time.	ServiceNow Service Portal, Catalog Builder, Service Catalog UI
API Gateway / Process	Orchestrates submission events, routes checkout actions, and	ServiceNow Process Automation

Engine	handles request binding between Maintain Items and Flow Designer without manual intervention.	Engine, Glide API, REST APIs
Application & Workflow Logic	Executes the automated 'Standard laptop task' flow upon catalog triggers. Handles approver state changes, auto-generates Catalog Tasks (SCTASK), sets short descriptions, and routes directly to the Hardware assignment group.	ServiceNow Flow Designer, Workflow Studio, Global Scope Actions
Data / Storage Layer	Maintains multi-table relational persistence for procurement transactions, linking REQ, RITM, approval states, and SCTASK records to ensure traceability and auditability.	ServiceNow Relational Database (sc_request, sc_req_item, sc_task, sysapproval_approver)
